Professional Paintless Dent Repair Tools • Vol. 10

*Paintless Dent
Repair is the next
best thing to it
never happening!*

Dentcraft Tools was established in 1997 by founder and PDR Technician, Sid Emmert. Before Sid started manufacturing tools, he met with professional metallurgists to choose the appropriate steel for each particular tool. Dentcraft Tools uses several different high carbon steels in each set. In quality control testing, our material far exceeds stainless steel tools in strength and durability. To the serious PDR professional, Dentcraft Tools' strength and design will meet or exceed your expectations. Produced with color-coded handles, you can be sure to grab the right tool to get the job done.

*PDR does more
to restore and*

We introduced the Company Set in 1997. Since then, we have improved the original Company Set with no additional price increase. To this day, the Company Set is still \$1,995. Since the introduction of the Company Set, Dentcraft Tools has produced and manufactured many more additional tools. With feedback from our customers, we will continue to grow and develop the best tools in the industry to keep up with the ever-evolving PDR trade.

*preserve the
value of an
automobile than
any other
alternative.*

In 2018, we introduced the Pro Set. Although you can still purchase the original Company Set, the Pro Set is more of an updated version with a cost of \$2,150. This set includes many of the same tools in the Company Set, as well as some of our other best selling tools.

At the time of purchase of the Company Set or Pro Set, your set can be expanded with any tool we manufacture at a discounted rate of 35% off the individual tool price. In other words, when you purchase the Company Set or Pro Set, you can purchase one (per Company Set or Pro Set purchased) of each tool we manufacture (not in the set) to expand your set at a 35% discount. This allows you to expand your set to suit your needs, at the same great value.

Dentcraft Tools

How To Order

Dentcraft Tools, L.P.
8118 Glade Avenue
Oklahoma City, OK 73132

Or Call Toll-Free: 1-888-738-6657

HANDLES - Dentcraft's rod handles are large and comfortable for heavy-duty work. The quick connect extender adds extra length to either side of the grip when needed.

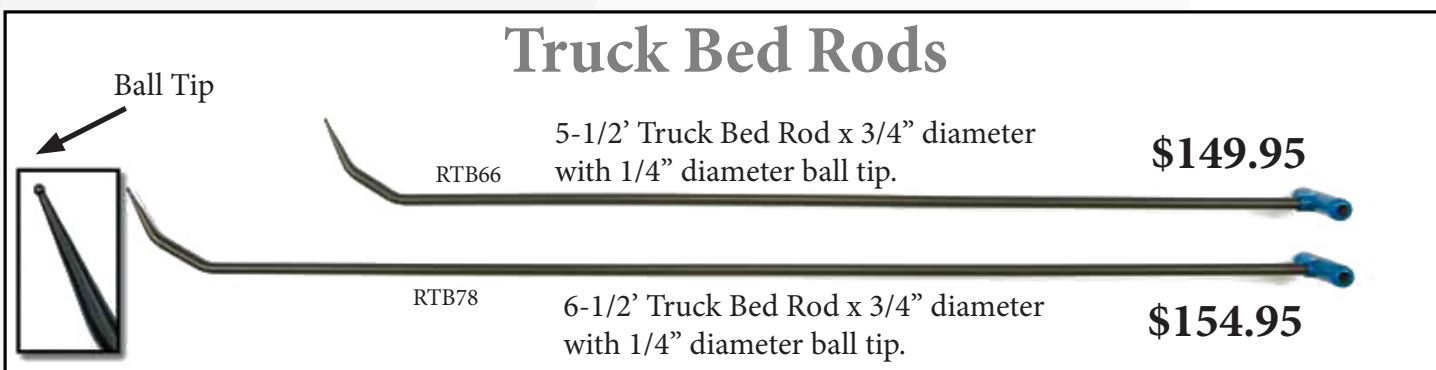

LARGE HOOKS - Dentcraft Tools large hook is a tapered marquise design, tempered to produce the most versatile and efficient tool, unparalleled in strength.

SMALL HOOK - This tool also has a tapered marquise design.

RODS - Dentcraft Rods have the highest strength to size ratio in the industry and are sized for standard hole clearance (i.e., our 1/2" rod is actually 6 thousandths under 1/2" for ease of use in a standard hole)

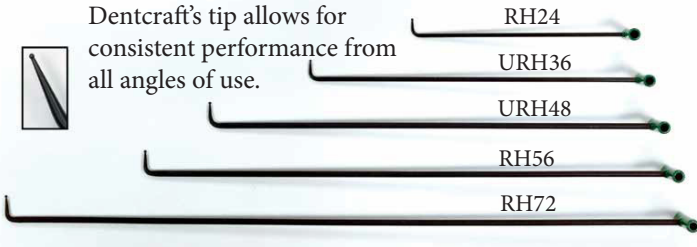

TIPS - Dentcraft's single and double bend tips are a tapered, teardrop design. This allows maximum strength with minimum thickness, a smooth, non-dragging tool with a knife-edge on the inside for cutting glue between skin and brace. The tips of the hail rods are all precision turned to ensure the desired hail rod tip and taper consistency.

Truck Bed Rods

BRC10 **\$259.95**
(10pc Brace Set (5 Left, 5 Right))

BRC6 **\$159.95**
6pc Brace Set (6 Largest, 3 Left and 3 Right)

Brace Tools - The brace tools are left and right-handed specific for ease of use around braces. The 10 degree angle is moved well back to maximize reach and minimize high spots. The handle is rotated 12 degrees to improve ergonomics. For hail damage, these are a must have for every dent tech.

Handle Colors - The brace tools are color specific by right/left handed tools. (Yellow for Left, Red for Right)

Straight and Heavy Shaft Brace Tools - Many techs have requested variations of our popular Left and Right Brace Set. By request, we now have Left and Right 14", 18", and 24" length straight brace tools. Also in Left and Right, we now have 1/4" diameter (heavy) 6" and 10" brace tools.

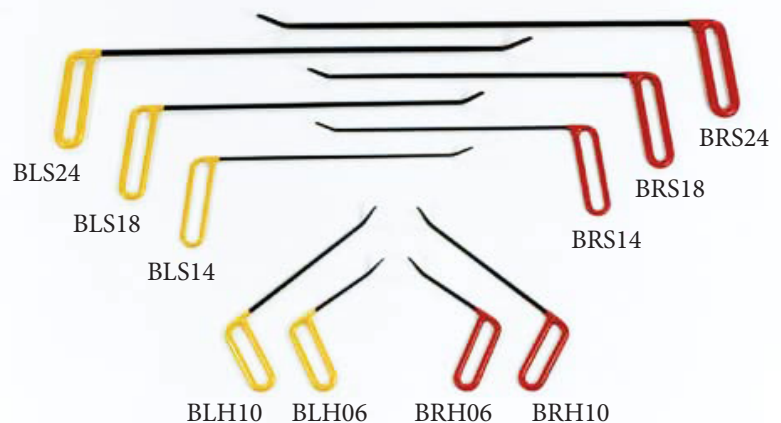

Straight & Heavy Shaft Brace Tools

BLS24	\$32.95	.306 (5/16) x 24" Straight Shaft

Whale Tails

- **Ultra-Thin** Whale Tail series is 1/2 inch wide at the tip and will fit into a 7/16 inch or larger hole.
 - **Thin** Whale Tail series is 3/4 inch wide at the tip and 1/8 inch thick at the thickest point. Fits in 9/16 inch or larger hole.
 - **Standard** Whale Tail series is 1-1/8 inch wide at the tip. Fits in 1 inch or larger hole
 - **Wide** Whale Tail series is 1-1/2 inches wide at the tip. Fits in 1-1/4 inch or larger hole
 - **Extra-Wide** Whale Tail series is 2 inches wide at the tip. Fits in 1-1/2 inch or larger hole
 - **Hammer Head** Whale Tail series is 3 inches wide at the tip. Fits in 2-1/4 inch or larger hole.
- The shafts are all rounded at the top to minimize lines and high spots. The rate of taper and flair is designed to torque evenly as possible for the best response and best feel.

Door Whale Tails

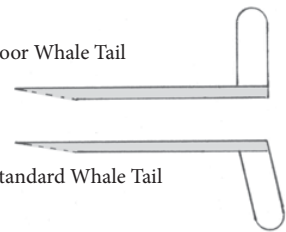

RWT24 **\$64.95** 1-1/8" Tip x 24" w/Reverse Handle

RWT20 **\$64.95** 3/4" Tip x 20" w/Reverse Handle

(same tool, same bevel, different handle configuration)

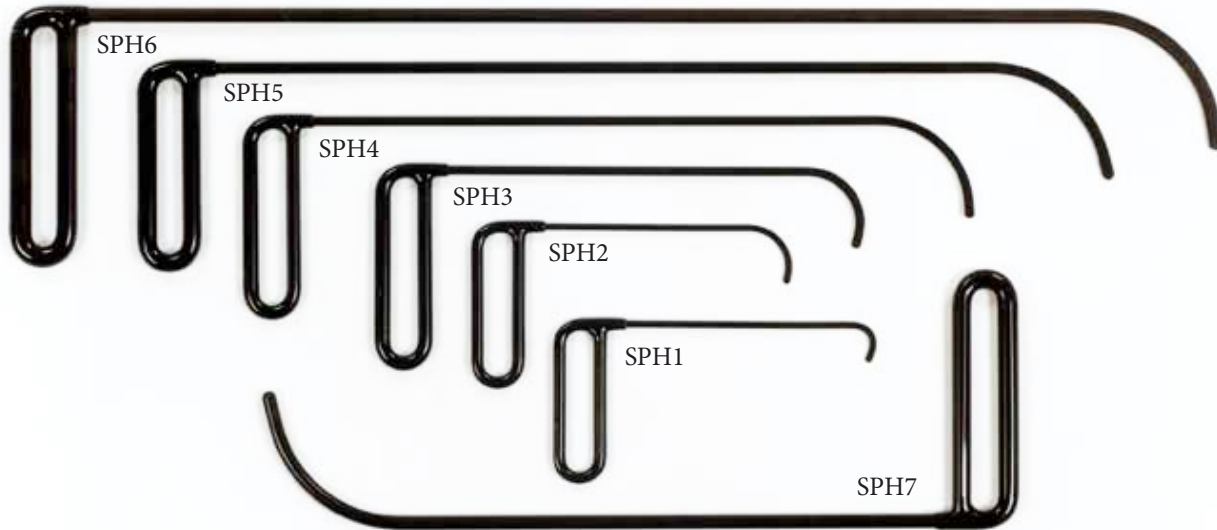

Door Whale Tail

Standard Whale Tail

These Whale Tails are made to the same specifications, only with reverse handles. **These are ideal for working behind braces in doors. The reverse handle will clear the glass and posts while the bevel tracks to the outside near the skin, allowing better access.** Door Whale Tails are designated by the black tip.

Door Tools

These door tools are ideal for working from the top of doors. The handles are left and right specific at 78 degrees to allow greater strength and control. The flags are forward reach 20 degrees and backward reach 20 degrees in both 3 1/2" and 5" lengths. The overall length of the shaft is 22". The larger 5" flag also has a larger handle.

(8", 14", and 22" Left and Rights)

STT6
\$295.00

8pc Shaved Tool Set
(All 8 Shaved Tools)

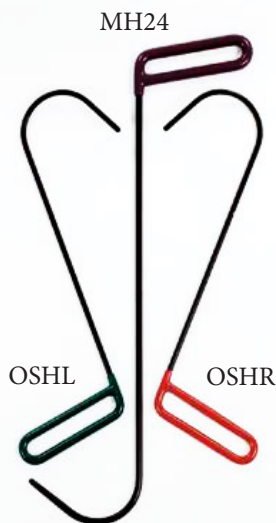

STT8
\$395.00

HANDLES - The shaved tool handle colors are color specific by left (yellow) and right (red) handed tools in the 8", 14" and 22" lengths. The 32" and 46" handles are color specific by length of the tool and is not left or right hand specific. All shaved tool handle lengths are 5". On the 8", 14", and 22", the handles have a 1/2" separation between the handle and the shaft, and on the 32" and 46" there is no separation between the handle and the shaft.

FLAGS - The length of the flag on all of the shaved tools is 7/8" and are set at a 70 degree angle. The thickness of the flag on the 8", 14", and 22" is .045" and the thickness of the flag on the 32" and 46" is .055".

SHAFT - The thickness of the shaft on the 8", 14", and 22" is .306" near the handle and is shaved down to .045" near the flag. The thickness of the shaft on the 32" and 46" is .306" near the handle and is shaved down to .055" near the flag. There is a 25 degree bias on the 8", 14", and 22" and a 0 degree bias on the 32" and 46".

Working Diameter is the diameter at the working area of the tip, expressed in sixteenths of an inch.

Interchangeable Tips

Thread Count Is 5/16-18

These interchangeable tips will allow you to select the most appropriate tip to match the type of damage and auto being worked. Hard, jagged hail might require a smaller tip than slushy hail. Plastic tips can help minimize scratches on the back of panels. Mushroom tips can push up large areas.

	STYLE OF TIP	WORKING DIAMETER	FINISH
B	12		
H	24	P	
R	8	R	
M	32	B	

Finish (unmarked is tempered steel)
 P Plastic Version
 R Steel Coated in a hard **RED** PVC
 B Steel Coated in a soft **BLUE** PVC

Style of Tip
 B Bullet Tip
 H Half Inch
 R Round (Ball Tip)
 M Mushroom
 E Extension

Plastic tips are very slick; scuffing the tips help, if using with rod. Polish for use with knockdowns or knockdown hammers.

Aluminum Knock Downs

Aluminum knock downs with interchangeable tips allow you to create the ideal knock down for the type of work being done. Both the long (4-3/4") and short (3-3/4") knock downs come standard with the B4-P tip, unless otherwise requested. You may swap for any tip that Dentcraft manufactures (excluding polished blending tips) at no additional charge. Swapping for a polished blending tip will add an additional charge.

- aluminum - lightweight, yet rigid
- hollow shaft
- button top strike head
- hexagonal outer ring to roll less
- knurled rings for easy grip
- over 100 different tips to choose from (p.25-27)

Steel Knock Downs

STKDL 109 grams / 3.84 ounces

Knock Down Hammers

3pc Knock Down Hammer Set

KDHST
\$139.95

Large 1-1/2" strike face

- a hammer built specifically for the PDR industry
- all aluminum and very light weight
- multi-use tool with a strike face on one side and an interchangeable tip on the other
- use any of the interchangeable tips (p.25-27) to make it ideal for the particular job
- the longer KDH22 and KDH32 can be used to reach difficult areas as a knock down, or put on a mushroom tip and directly work larger high areas
- smooth contours and grip to minimize scratching
- when used with Dentcraft Tools aluminum knockdowns, a tech can stay focused on the dent area, and easily strike the knock down

Double Tipped Knock Down Hammers

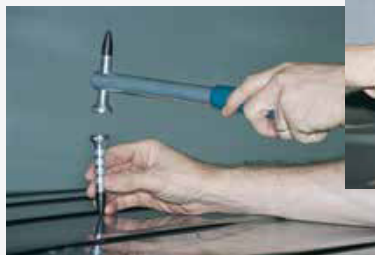

- same lengths and weights as original knock down hammer set
- detachable large 1-1/2" strike face lets the tech now be able to use an interchangeable tip (p.25-27) on each side of the hammer
- DTKDH12 and DTKDH22 comes standard with detachable strike face and B4-P tip, DTKDH32 comes standard with detachable strike face and M96-B tip
- swap the standard interchangeable tip and/or detachable strike face with any interchangeable tip that Dentcraft manufactures (p.25-27) at no additional charge (excluding mirror polished tips, mirror polished tips can be swapped for an additional charge)

Long reach knock down

Use with padded tips for large high spots or "eye brows"

Indexable Handle Tools

Some of Dentcraft's best selling PDR Tools are now available with adjustable handles. Adjustable Dent Tools allow the PDR Technician to arrange the handle in various positions for comfort and leverage. The new and improved handle takes about **20lbs** of pressure. Handles are adjustable by pushing **DOWN** on the handle.

Handle rotates 360°

Accessories

3pc Dent Dollies

DNTDL

\$29.95

Red = 12 inch / 30.4cm radius
Yellow = 24 inch / 61cm radius
Blue = No bend / No radius

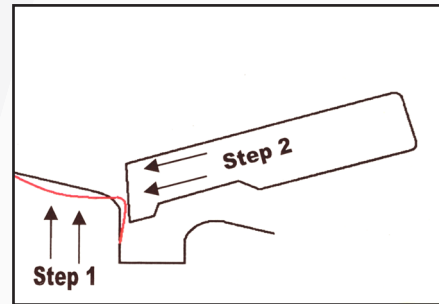

A simple, but significant tool for dents that overlap the edge of body panels (i.e., roof tops, wheel wells, fender, and quarter tops).

Step 1

Work the dent from underneath as usual until a “plateau” of effectiveness is encountered. (Note: the reason this happens is because the corners are still holding the dent).

Step 2

Use the Dent Dollies to knock down the high spots that are wrapped around the corner, and to release the stresses holding down the “flat spot” (see illustration to the upper right)

There are three different radii of Dent Dollies to best match the contours of body corners

- Changing the strike angle can change the way and where the metal is raised.
- Start light
